- DURABLE AND RELIABLE**

DuraMax® Extraoral Suction System

Removes contaminants produced during dental procedures including droplets, aerosols, blood, dust, and virus and uses the most advanced Quattro layer filtration system to kill viruses and bacteria absorbed with over 99.9% efficiency.

During treatments, a high volume of droplets and aerosols are produced by high-speed handpieces, ultrasonic scalers, and air water syringe that can linger in the air for up to two hours. This places practitioners and office staff health at risk of infections.

Efficient Filtration
