**DuraMax**  
**Extraoral Suction System**

Removes contaminants produced during dental procedures including droplets, aerosols, blood, dust, and virus and uses the most advanced Quattro layer filtration system to kill viruses and bacteria absorbed with over 99.9% efficiency.

During treatments, a high volume of droplets and aerosols are produced by high-speed handpieces, ultrasonic scalers, and air water syringe that can linger in the air for up to two hours. This places practitioners and office staff health at risk of infections.

# PeriAcryl® 90 High Viscosity

## Benefits of PeriAcryl®90

PeriAcryl®90 forms a zone of inhibition against bacteria that can cause infection.

Using PeriAcryl®90 helps stop bleeding and seals off wounds to reduce surgical time spent on achieving hemostasis or placing sutures.

## Characteristics of PeriAcryl®90

- Polymerizes rapidly in contact with water or moist oral tissue.
- Stays in place for up to 14 days when a multi-layer application is made.
- Dyed violet for increased visibility during application.
- Biocompatible and non-toxic
